Asbestos Awareness

Health and Safety Courses for Staff/Managers/Business Owners

Who should attend	General maintenance staff; electricians; plumbers; gas fitters; painters and decorators; joiners; plasterers; demolition workers; construction workers; roofers; heating and ventilation engineers; telecommunications engineers; fire and burglar alarm installers; computer installers; architects, building surveyors and other such professionals; shop fitters.
Why you should attend	Every week 20 tradesmen die from asbestos-related disease. If you carry out work on a building that was built or refurbished before the year 2000, you could have been exposed to asbestos, without even knowing it. Asbestos is a hidden killer. So now's the time to get clued up on the facts, so that you, your workmates, your friends and family are protected.
What you will learn	• How to protect yourself from an asbestos-related illness • To know what to do if you suspect asbestos might be present
Course content	• The properties of asbestos and its effects on health, including its interaction with smoking • The types of products or materials likely to contain asbestos • The operations which could result in asbestos exposure and the importance of preventive controls to minimise exposure • Managers Responsibilities • Role of Asbestos Surveys • Safe work practices, control measures and protective equipment • The purpose, choice, limitations, proper use and maintenance of respiratory protective equipment • Emergency procedures and medical examination • How to maintain effective hygiene • Control limits and air monitoring
