

# IOSH Working Safely

## Health and Safety Courses for Staff

Who should attend	Working safely is for people at any level, in any sector, needing a grounding in the essentials of health and safety.
Why you should attend	Everyone at work should have an understanding of why they must 'work safely' - and this course offers exactly that.
What you will learn	Individual responsibilities for health and safety in the workplace and towards others who may be affected by your acts or omissions.
Expected outcomes	To be able to work safely—and act when others are not. <ul style="list-style-type: none"><li>• Introducing working safely stressing the realities of the human suffering behind the statistics and emphasising the importance of personal responsibility.</li><li>• Putting 'hazard' and 'risk' into everyday language, using familiar examples to show what can happen.</li><li>• Focusing on the six broad hazard groups, delegates are asked to think about the hazards and risks they come across in their own work.</li><li>• Identifying common hazards backed by crystal clear examples and recognisable scenarios.</li><li>• Improving safety performance - bridging the gap between management and workforce, encouraging delegates to play a part in processes that are commonly seen as just down to their manager or supervisor, including contract work, inspections, safe systems and permits, protective equipment, signage, emergency procedures, reporting and health checks.</li><li>• An introduction to waste and pollution looking at how organisations and individuals can get involved in reducing environmental impacts.</li></ul>
