RSP Safety Services Skills Training

We have put these courses together where we feel that the traditional courses offered by accredited bodies are not up to the mark. They are designed and delivered by experienced safety practitioners that have 'got the T shirt'. They concentrate on the practical aspects of the Regulations and what really works. The Skills courses include:

- DSE Risk Assessor
- General or task-based Risk Assessor
- Manual Handling Risk Assessor
- Asbestos Awareness
- Asbestos Awareness including carrying out non-licensed work

RSP Safety Services Master Classes

Learn from those who have seen it all! Our unique Master Classes are designed to provide experienced assessors, trainers and managers with additional insights into the practicalities of risk assessment and controls. They are delivered by experienced safety practitioners with many years of practical experience in real workplaces. If you are struggling with assessments or would just like to look at alternatives then this course is for you. These half day courses include:

- DSE Assessments
- Manual handling assessments
- COSHH assessments
- General risk assessments
- Accident investigation

Delivering H&S Induction Training

This course is for people who need to deliver induction training and is provided to support our comprehensive induction training pack. It will provide you with all the materials you need to deliver health and safety inductions.

CIEH Level 2 Manual handling Principles and Practice

This qualification introduces employees to the hazards and risks involved in manual handling to enable employees to develop safer manual handling techniques .

Manual Handling Risk Assessor

This one-day course will enable you to: carry out manual handling risk assessments, devise practical solutions and provide staff with instruction on safe lifting techniques.

High quality training you can't afford to miss!

Computer Work Station (DSE) Assessor

Learn how to assess computer workstations to comply with the Display Screen Equipment Regulations.

CIEH Professional Trainers Certificate

This course is ideal for anyone who needs to understand training practice or wants to refine their training techniques. Successful candidates will be able to structure, design and deliver interesting and stimulating training.

CIEH Level 3 Risk Assessment

This qualification ensures that supervisors and managers have the necessary depth of understanding to enable them to carry out general health and safety risk assessments.

CIEH Stress awareness

This course raises awareness of the likely sources of work-related stress. It is aimed at general workers and also serves as an introduction to the issue for more senior staff.

IOSH Managing Safely

Managing Safely is a course for managers and supervisors in any sector and any organisation. It's designed to give managers all they need to know to help them handle health and safety in their teams.

IOSH Working Safely

Working Safely is a one-day course for staff from any sector with no supervisory or managerial responsibility. It provides a grounding in the essentials of health and safety.

HABC Level 3 and 4 Health and Safety

This qualification will enable managers and supervisors to improve health and safety in their organisation, whatever its size or activity.

HABC Level 2 Health and Safety

This new qualification is designed to ensure that all employees are aware of their own safety and the safety of others.

CIEH Level 2 CoSHH Principles

This qualification is designed for those who use substances hazardous to health at work and the risks and controls available.

Managing Safety for Contractors

Need to write risk assessments and method statements for site work? This is for you!
